FORM 10-Q

(Mark One)

- QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the quarterly period ended **June 30, 2015**

or

- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission File Number: 1-7525

The Goldfield Corporation

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

88-0031580

(I.R.S. Employer Identification No.)

**1684 W. Hibiscus Boulevard
Melbourne, Florida 32901**

(Address of principal executive offices) (Zip Code)

(321) 724-1700

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

[Table of Contents](#)

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of the Registrant’s Common Stock outstanding as of August 11, 2015 was 25,451,354.

THE GOLDFIELD CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Note 1 – Organization and Summary of Significant Accounting Policies

Overview

The Goldfield Corporation (the “Company”) was incorporated in Wyoming in 1906 and subsequently reincorporated in Delaware in 1968. The Company’s principal line of business is electrical construction. The principal market for the Company’s electrical construction operation is electric utilities throughout much of the United States.

Basis of Financial Statement Presentation

In the opinion of management, the accompanying unaudited interim consolidated financial statements include all adjustments necessary to present fairly the Company’s financial position, results of operations, and changes in cash flows for the interim periods reported. These adjustments are of a normal recurring nature. All financial statements presented herein are unaudited with the exception of the consolidated balance sheet as of December 31, 2014, which was derived from the audited consolidated financial statements. The results of operations for the interim periods shown in this report are not necessarily indicative of results to be expected for the fiscal year. These statements should be read in conjunction with the financial statements included in the Company’s annual report on Form 10-K for the year ended December 31, 2014.

Allowance for Doubtful Accounts

The allowance for doubtful accounts is the Company’s best estimate of the amount of probable credit losses in the Company’s existing accounts receivable. The Company determines the allowance based on customer specific information and historical write-off experience. The Company reviews its allowance for doubtful accounts quarterly. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. Any increase in the allowance account has a corresponding negative effect on the results of operations. As of both June 30, 2015 and December 31, 2014, upon its review, management determined it was not necessary to record an allowance for doubtful accounts due to the majority of accounts receivable being generated by electrical utility customers who the Company considers creditworthy based on timely collection history and other considerations.

Use of Estimates

Management of the Company has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these financial statements in conformity with U. S. generally accepted accounting principles (“GAAP”). Actual results could differ from those estimates. Management considers the most significant estimates in preparing these financial statements to be the estimated cost to complete electrical construction contracts in progress, the adequacy of the accrued remediation costs and the realizability of deferred tax assets.

Fair Value of Financial Instruments

The Company’s financial instruments include cash and cash equivalents, accounts receivable and accrued billings, notes receivable, restricted cash collateral deposited with insurance carriers, cash surrender value of life insurance policies, accounts payable, notes payable, and other current liabilities.

Fair value is the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The fair value guidance establishes a valuation hierarchy, which requires maximizing the use of observable inputs when measuring fair value.

The three levels of inputs that may be used are:

Level 1 - Quoted market prices in active markets for identical assets or liabilities.

Level 2 - Observable market based inputs or other observable inputs.

Level 3 - Significant unobservable inputs that cannot be corroborated by observable market data. These values are generally determined using valuation models incorporating management’s estimates of market participant assumptions.

Fair values of financial instruments are estimated through the use of public market prices, quotes from financial institutions, and other available information. Management considers the carrying amounts reported in the consolidated balance sheets for cash and cash equivalents, accounts receivable and accrued billings, accounts payable and accrued liabilities, to approximate fair value due to the immediate or short-term maturity of these financial instruments. The fair value of notes receivable is considered by management to approximate carrying value based on their interest rates and terms, maturities, collateral, and current status of the receivables. The fair value of the Company’s long-term notes payable are also estimated by management to

approximate their carrying value since the interest rates prescribed by Branch Banking and Trust Company (the “Bank”) are variable market interest rates and are adjusted periodically. Restricted cash is considered by management to approximate fair value due to the nature of the asset held in a secured interest bearing bank account. The carrying value of cash surrender value of life insurance is also considered by management to approximate fair value as the carrying value is based on the current settlement value under the contract, as provided by the carrier.

Restricted Cash

The Company’s restricted cash includes cash deposited in a secured interest bearing bank account, as required by the Collateral Trust Agreement in connection with the Company’s workers’ compensation insurance policies, as described in note 8.

Goodwill and Intangible Assets

Intangible assets with finite useful lives are recorded at cost upon acquisition, and amortized over the term of the related contract or useful life, as applicable. Intangible assets held by the Company with finite useful lives include customer relationships and trademarks. All definite lived intangibles are amortized over their estimated useful lives. The Company reviews the values recorded for intangible assets and goodwill to assess recoverability from future operations annually or whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. As of December 31, 2014, the Company assessed the recoverability of its long-lived assets and believed that there were no events or circumstances present that would require a test of recoverability on those assets. As a result, there was no impairment of the carrying amounts of such assets and no reduction in their estimated useful lives.

Segment Reporting

The Company operates as a single reportable segment, electrical construction, under ASC Topic 280-10-50 *Disclosures about Segments of an Enterprise and Related Information*. Certain corporate costs are not allocated to a segment.

Reclassifications

Certain amounts previously reflected in the prior year statement of cash flows have been reclassified to conform to the Company’s 2015 presentation. The cash flows from operating activities includes amounts under contract loss accruals which were previously reported within accounts payable and accrued liabilities. This reclassification had no effect on the previously reported total cash flows from operating activities.

Recent Accounting Pronouncements

In April 2014, the Financial Accounting Standards Board (“FASB”) issued an Accounting Standards Update (“ASU”) 2014-08 relating to the reporting of discontinued operations and the disclosures related to disposals of components of an entity. The new standard addresses the question around whether the disposal represents a strategic shift, if the operations and cash flows can be clearly distinguished and continuing involvement will no longer preclude a disposal from being presented as discontinued operations. These changes were effective for the Company for interim and annual periods after December 15, 2014 and had no material impact on its consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, which will replace most existing revenue recognition guidance in U.S. generally accepted accounting principles and is intended to improve and converge the financial reporting requirements for revenue from contracts with customers with International Financial Reporting Standards (“IFRS”). The core principle of ASU 2014-09 is that an entity should recognize revenue for the transfer of goods or services equal to the amount that it expects to be entitled to receive for those goods or services. ASU 2014-09 also requires additional disclosures about the nature, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments. ASU 2014-09 allows for both retrospective and prospective methods of adoption and is effective for periods beginning after December 15, 2016. The Company is currently evaluating the method of adoption and the impact that the adoption of ASU 2014-09 will have on its consolidated financial statements. In July 2015, a one-year deferral of the revenue recognition standard’s effective date was approved. Public business entities are required to apply the revenue recognition standard to annual reporting periods beginning after December 15, 2017, and interim periods within those annual periods. Early application is permitted but not before the original effective date for public business entities (annual reporting periods beginning after December 15, 2016). The option to use either a retrospective or cumulative-effective transition method did not change.

In August 2014, the FASB issued ASU 2014-15 requiring management to perform interim and annual assessments of an entity’s ability to continue as a going concern within one year of the date the financial statements are issued. The standard also provides guidance on determining when and how to disclose going-concern uncertainties in the financial statements. The new guidance is effective for the annual period ending after December 15, 2016, and interim periods thereafter, with early adoption permitted. The Company is currently evaluating the impact that the adoption of ASU 2014-15 will have on its consolidated financial statements.

In April 2015, the FASB issued ASU 2015-03 that intends to simplify the presentation of debt issuance costs. The new standard will more closely align the presentation of debt issuance costs under U.S. generally accepted accounting principles with the presentation under comparable IFRS standards. Debt issuance costs related to a recognized debt liability will be presented on the balance sheet as a direct deduction from the debt liability, similar to the presentation of debt discounts. ASU 2015-03 is effective for public business entities for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. The cost of issuing debt will no longer be recorded as a separate asset, except when incurred before receipt of the funding from the associated debt liability. Under current U.S. generally accepted accounting principles, debt issuance costs are reported on the balance sheet as assets and amortized as interest expense. The costs will continue to be amortized to interest expense using the effective interest method. The Company is currently evaluating the impact that the adoption of ASU 2015-03 will have on its consolidated financial statements.

In April 2015, the FASB issued ASU 2015-05 which provides guidance to customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The guidance will not change U.S. generally accepted accounting principles for a customer's accounting for service contracts. The standard will be effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. The Company is currently evaluating the impact that the adoption of ASU 2015-05 will have on its consolidated financial statements.

Note 2 – Income Taxes

The following table presents the provision for income tax and the effective tax rate from continuing operations for the three and six month periods ended June 30 as indicated:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Income tax provision	\$ 1,285,701	\$ 266,443	\$ 547,392	\$ 464,583
Effective income tax rate	45.9%	38.4%	45.1%	37.9%

The Company's expected tax rate for the year ending December 31, 2015, which was calculated based on the estimated annual operating results for the year, is 45.1%. The expected tax rate differs from the federal statutory rate of 34.0% mainly due to non-deductible expenses and to a lesser extent state income taxes.

The effective tax rate for the three and six months ended June 30, 2015 were 45.9% and 45.1%, respectively. The effective tax rate for the three months ended June 30, 2015 differs from the expected tax rate due to an adjustment of annual operating results for the year. The effective tax rate for the six months ended June 30, 2015 reflects the expected tax rate for the year.

The effective tax rate for the three and six months ended June 30, 2014 were 38.4% and 37.9%, respectively, and differ from the federal statutory rate of 34.0% primarily due to state income taxes.

The current deferred tax assets decreased to \$948,000 as of June 30, 2015 from \$2.3 million as of December 31, 2014 primarily due to the decrease in accrued contract losses. The non-current deferred tax liabilities were \$7.9 million and \$8.0 million as of June 30, 2015 and December 31, 2014, respectively.

The carrying amounts of deferred tax assets are reduced by a valuation allowance if, based on the available evidence, it is more likely than not such assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which the deferred tax assets are expected to be recovered or settled. In the assessment for a valuation allowance, appropriate consideration is given to positive and negative evidence related to the realization of the deferred tax assets. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability, the duration of statutory carryforward periods, experience with loss carryforwards expiring unused, and tax planning alternatives. If the Company determines it will not be able to realize all or part of the deferred tax assets, a valuation allowance would be recorded to reduce deferred tax assets to the amount that is more likely than not to be realized.

Based on assumptions with respect to forecasts of future taxable income and tax planning, among others, the Company anticipates being able to generate sufficient taxable income to utilize the deferred tax assets. Therefore, the Company has not recorded a valuation allowance against deferred tax assets. The minimum amount of future taxable income required to be generated to fully realize the deferred tax assets as of June 30, 2015 is approximately \$3.0 million.

The Company has gross unrecognized tax benefits of \$11,000 as of both June 30, 2015 and December 31, 2014. The Company believes that it is reasonably possible that the liability for unrecognized tax benefits related to certain state income tax matters

may be settled within the next twelve months. The federal statute of limitation has expired for tax years prior to 2008 and relevant state statutes vary. The Company is currently not under any income tax audits or examinations and does not expect the assessment of any significant additional tax in excess of amounts provided.

The Company accrues interest and penalties related to unrecognized tax benefits as interest expense and other general and administrative expenses, respectively, and not as a component of income taxes.

Note 3 – Discontinued Operations

Commitments and Contingencies Related to Discontinued Operations

Through certain of our subsidiaries and predecessor companies, the Company was previously engaged in mining activities and ended all such activities in December 2002.

Effective September 15, 2014, the Company entered into an Administrative Order on Consent (“AOC”) with the United States Environmental Protection Agency (the “EPA”) with respect to a previously owned mining property, the Sierra Zinc Site located in Stevens County, Washington (the “Site”). The Company sold the Site over fifty years ago. The Site includes a tailings impoundment that was not previously reclaimed. Pursuant to the AOC, the Company agreed to undertake certain remediation actions at the Site, which work has commenced and is expected to be substantially completed by September 30, 2015. The contract price for this work is \$1.3 million. As of June 30, 2015, approximately 60.9% of the contract work was completed, with a remaining balance of contract work of \$516,000. This amount does not include certain other charges, such as potential change orders, environmental oversight costs and other direct and indirect costs.

Based on the foregoing, the Company has reasonably estimated the amounts related to this response action in accordance with ASC Topic 450-20, *Loss Contingencies*, and established a contingency provision within discontinued operations. As of June 30, 2015 and December 31, 2014, the balance of the estimated contingency provision accrued by the Company was \$815,000 and \$1.1 million, respectively. This contingency provision represents the estimated costs of the response action, as provided by the Company’s environmental consultants, as well as the anticipated legal costs. It is reasonably possible the total actual costs to be incurred at the Site in future periods may vary from this estimate.

During the three and six months ended June 30, 2015, the Company increased its contingency provision within discontinued operations by \$356,000. The increase for the three and six months ended June 30, 2015 is associated with amounts already expended and the estimated future costs anticipated for professional, legal and EPA costs, in excess of amounts provisioned in 2014. This increase is mainly attributable to changes in the scope of the project management portion, as required by the EPA and is estimated based on information provided by the Company’s environmental consultants.

The provision will be reviewed periodically based upon facts and circumstances available at the time. The costs provisioned for future expenditures related to this environmental obligation are not discounted to present value.

The Company made claims with two of its insurers for certain defense and remediation costs related to the Site. In December 2014, the Company received \$377,000 from these insurers in full settlement of the previously disclosed declaratory judgment actions related to such claims. This payment was recorded upon its receipt and is recorded as a gain within discontinued operations and is not reflected in the accrued remediation costs. In addition, the Company previously received defense reimbursements from the insurers aggregating \$201,000, which is reflected in the calculation of the contingency provision.

As of June 30, 2015 and December 31, 2014, respectively, discontinued operations had no liabilities other than the accrued remediation costs associated with the aforementioned EPA action.

	June 30, 2015	December 31, 2014
Accrued remediation costs current	\$ 800,113	\$ 1,048,380
Accrued remediation costs non-current	15,000	15,000
Total liabilities of discontinued operations	\$ 815,113	\$ 1,063,380

[Table of Contents](#)

The following table presents the unaudited operating results of the discontinued operations for the three and six month periods ended June 30, as indicated:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Provision for remediation costs	<u>\$ (355,892)</u>	<u>\$ (1,070,825)</u>	<u>\$ (355,892)</u>	<u>\$ (1,070,825)</u>
Loss from discontinued operations before income taxes	(355,892)	(1,070,825)	(355,892)	(1,070,825)
Income tax benefit	(154,855)	(405,478)	(154,855)	(405,478)
Loss from discontinued operations, net of tax	<u>\$ (201,037)</u>	<u>\$ (665,347)</u>	<u>\$ (201,037)</u>	<u>\$ (665,347)</u>

The Company's effective tax benefit rates related to discontinued operations for both the three and six month periods ended June 30, 2015 was (43.5)%. The effective tax benefit rate differs from the statutory rate of (34.0)% primarily due to non-deductible expenses and state income taxes. The Company's effective tax benefit rates related to discontinued operations for both the three and six month periods ended June 30, 2014 was (37.9)%. The effective tax benefit rate differs from the statutory rate of (34.0)% primarily due to state income taxes.

Note 4 – Notes Payable

The following table presents the balances of our notes payable as of the dates indicated:

	Lending Institution	Maturity Date	June 30,	December 31,	Interest Rates	
			2015	2014	June 30, 2015	December 31, 2014
Working Capital Loan	Branch Banking and Trust Company	June 16, 2016	\$ 3,500,000	\$ —	2.19%	2.19%
\$6.94 Million Equipment Loan	Branch Banking and Trust Company	February 22, 2016	—	2,701,343	—%	2.69%
\$1.5 Million Equipment Loan	Branch Banking and Trust Company	October 17, 2016	—	727,000	—%	2.69%
\$4.25 Million Equipment Loan	Branch Banking and Trust Company	September 19, 2016	—	2,094,000	—%	2.69%

\$5.0 Million Equipment Loan	Branch Banking and Trust Company	April 22, 2018	—	3,703,704	—%	2.67%
\$3.5 Million Acquisition Loan	Branch Banking and Trust Company	January 28, 2019	—	2,858,150	—%	2.19%
\$10.0 Million Equipment Loan	Branch Banking and Trust Company	July 28, 2020	10,000,000	10,000,000	2.19%	2.19%
\$17.0 Million Equipment Loan	Branch Banking and Trust Company	March 6, 2020	16,149,500	—	2.00%	—%
\$2.0 Million Equipment Loan	Branch Banking and Trust Company	March 6, 2020	2,000,000	—	2.00%	—%
\$7.9 Million Installment Sale Contract	Caterpillar Financial Services Corporation	July 17, 2016	—	3,259,635	—%	3.45%
Total notes payable			31,649,500	26,343,832		
Current portion of notes payable			(7,952,926)	(3,685,859)		
Notes payable, less current portion			\$ 23,696,574	\$ 22,657,973		

As of June 30, 2015, the Company, and the Company’s wholly owned subsidiaries Southeast Power, Pineapple House of Brevard, Inc. (“Pineapple House”), Bayswater Development Corporation (“Bayswater”), Power Corporation of America (“PCA”) and C and C Power Line, Inc. (“C&C”), collectively (the “Debtors,”) were parties to a Master Loan Agreement, dated March 6, 2015 (the “2015 Master Loan Agreement”), with Branch Banking and Trust Company (the “Bank”).

All loans with the Bank are guaranteed by the Debtors and include the grant of a continuing security interest in all now owned, hereafter acquired and wherever located personal property of the Debtors.

As of June 30, 2015, the Company had a loan agreement and a series of related ancillary agreements with the Bank providing for a revolving line of credit loan for a maximum principal amount of \$15.0 million, to be used as a “Working Capital Loan.” As of June 30, 2015 and December 31, 2014, borrowings under the Working Capital Loan were \$3.5 million and \$0, respectively. The Working Capital Loan will bear interest at a rate per annum equal to one month LIBOR (as defined in the

[Table of Contents](#)

ancillary loan documents) plus two percent 2.00% (previously 2.50%), which will be adjusted monthly and subject to a maximum of 24.00%. Pricing is based on the following table:

Leverage Ratio	Applicable Margin for LIBOR Loans and Letter of Credit Fees	Unused Commitment Fee
< 1.0x	175.0 bps	25 bps
≥ 1.0x but < 1.5x	200.0 bps	37.5 bps
≥ 1.5x but < 2.0x	225.0 bps	37.5 bps
≥ 2.0x but < 2.5x	250.0 bps	50.0 bps
≥ 2.5x but < 3.0x	275.0 bps	50.0 bps

“Leverage ratio” means total liabilities to tangible net worth. Pricing will be adjusted on a quarterly basis based on the table above and the Company’s quarterly financial reports with any interest rate changes taking effect in the month following receipt of the quarterly financial reports. Interest only payments are payable monthly commencing on January 16, 2014, and continuing on the same day of each month thereafter, until June 16, 2016.

Under the ancillary agreements relating to the Working Capital Loan, the Company agrees to pay an unused commitment fee on any difference between the face amount of the Working Capital Loan and the amount of credit it actually uses, determined by the average of the daily amount of credit outstanding during the specified period. The fee will be calculated annually at the rates set forth in the table above and was due on April 1, 2014 and the same day of each following quarter until the maturity date of the Working Capital Loan. The unused portion of the Working Capital Loan as of June 30, 2015, was \$11.5 million.

The Working Capital Loan, as described above, and the \$10.0 Million Equipment Loan, bear interest at a rate per annum equal to one month LIBOR (as defined in the ancillary loan documents) plus two percent 2.00%, which is adjusted monthly and subject to a maximum interest rate of 24.00%.

Both the \$17.0 Million Equipment Loan and the \$2.0 Million Equipment Loan bear interest at a rate per annum equal to one month LIBOR (as defined in the documentation related to each loan) plus 1.80%, which will be adjusted monthly and subject to a maximum rate of 24.00%.

The Company’s debt arrangements contain various financial and other covenants including, but not limited to: minimum tangible net worth, maximum debt to tangible net worth ratio and fixed charge coverage ratio. Other loan covenants prohibit, among other things, a change in legal form of the Company, and entering into a merger or consolidation. The loans also have cross-default provisions whereby any default under any loans of the Company (or its subsidiaries) with the Bank will constitute a default under all of the other loans of the Company (and its subsidiaries) with the Bank.

Note 5 – Commitments and Contingencies

Performance Bonds

In certain circumstances, the Company is required to provide performance bonds to secure its contractual commitments. Management is not aware of any performance bonds issued for the Company that have ever been called by a customer. As of June 30, 2015, outstanding performance bonds issued on behalf of the Company’s electrical construction subsidiary amounted to approximately \$59.7 million.

Collective Bargaining Agreements

C&C, one of the Company’s electrical construction subsidiaries, is party to collective bargaining agreements with unions representing workers performing field construction operations. The collective bargaining agreements expire at various times and have typically been renegotiated and renewed on terms similar to the ones contained in the expiring agreements. The agreements require the subsidiary to pay specified wages, provide certain benefits to their respective union employees and contribute certain amounts to multi-employer pension plans and employee benefit trusts. The subsidiary’s multi-employer pension plan contribution rates generally are specified in the collective bargaining agreements (usually on an annual basis), and contributions are made to the plans on a “pay-as-you-go” basis based on such subsidiary’s union employee payrolls, which cannot be determined for future periods because contributions depend on, among other things, the number of union employees that such subsidiary employs at any given time; the plans in which it may participate vary depending on the projects it has ongoing at any time; and the need for union resources in connection with those projects. If the subsidiary withdraws from, or otherwise terminates its participation in, one or more multi-employer pension plans, or if the plans were to otherwise become substantially underfunded, such subsidiary could be assessed liabilities for additional contributions related to the underfunding of these plans. The Company is not aware of any amounts of withdrawal liability that have been incurred as a result of a withdrawal by C&C from any multi-employer defined benefit pension plans.

Note 6 – Income (Loss) Per Share of Common Stock

Basic income (loss) per common share is computed by dividing net income (loss) by the weighted average number of common stock shares outstanding during the period. Diluted income (loss) per share reflects the potential dilution that could occur if common stock equivalents, such as stock options outstanding, were exercised into common stock that subsequently shared in the earnings of the Company.

As of June 30, 2015 and 2014, the Company had no common stock equivalents. The computation of the weighted average number of common stock shares outstanding excludes 2,362,418 shares of Treasury Stock for each of the three and six month periods ended June 30, 2015 and 2014.

Note 7 – Customer Concentration

A significant portion of the Company’s electrical construction revenue has historically been derived from three or four utility customers each year. For both the three months ended June 30, 2015 and 2014, the three largest customers accounted for 58% of the Company’s total revenue. For the six months ended June 30, 2015 and 2014, the three largest customers accounted for 56% and 57%, respectively, of the Company’s total revenue.

Note 8 – Restricted Cash

On October 25, 2010, the Company, as grantor, Valley Forge Insurance Company (the “Beneficiary”) and Branch Banking and Trust Company (the “Trustee”) entered into a Collateral Trust Agreement (the “Agreement”) in connection with the Company’s workers’ compensation insurance policies issued by the Beneficiary (the “Policies”) beginning in 2009. The Agreement was made to grant the Beneficiary a security interest in certain of the Company’s assets and to place those assets in a Trust Account to secure the Company’s obligations to the Beneficiary under the Policies. The deposits maintained under the Agreement are recorded as restricted cash, within the non-current assets section of our balance sheet.

Note 9 – Goodwill and Other Intangible Assets Associated with the Acquisition of C&C

On January 3, 2014, PCA completed its acquisition of all the issued and outstanding shares of stock of C&C. The purchase price was \$7.3 million in cash, subject to certain customary post-closing adjustments. As of December 31, 2014 all such adjustments were recognized. In connection with the acquisition of C&C, the Company acquired intangible assets with definite useful lives primarily consisting of trademarks and names, customer relationships and non-competition agreements and are amortized over periods from five to twenty years. The aggregate cash consideration paid, net of cash acquired of \$1.4 million, was \$5.8 million, of which \$101,000 was allocated to goodwill, \$1.0 million to acquired other intangible assets, \$3.3 million to property and equipment, \$2.6 million to net current assets and \$1.3 million to net liabilities assumed.

The following table presents the gross and net balances of our goodwill and intangible assets as of the dates indicated:

	Useful Life (Years)	June 30, 2015			December 31, 2014		
		Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Indefinite-lived and non-amortizable acquired intangible assets							
Goodwill	Indefinite	\$ 101,407	\$ —	\$ 101,407	\$ 101,407	\$ —	\$ 101,407
Definite-lived and amortizable acquired intangible assets							
Trademarks/Names	15	\$ 640,000	\$ (64,000)	\$ 576,000	\$ 640,000	\$ (42,667)	\$ 597,333
Customer relationships	20	350,000	(26,250)	323,750	350,000	(17,500)	332,500
Non-competition agreement	5	10,000	(3,000)	7,000	10,000	(2,000)	8,000
Other	1	13,800	(13,800)	—	13,800	(13,800)	—
Total intangible assets, net		\$ 1,013,800	\$ (107,050)	\$ 906,750	\$ 1,013,800	\$ (75,967)	\$ 937,833

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Forward-Looking Statements

We make “forward-looking statements” within the meaning of the “safe harbor” provision of the Private Securities Litigation Reform Act of 1995 throughout this document. You can identify these statements by forward-looking words such as “may,” “will,” “expect,” “anticipate,” “believe,” “estimate,” “plan,” and “continue” or similar words. We have based these statements on our current expectations about future events. Although we believe that our expectations reflected in or suggested by our forward-looking statements are reasonable, we cannot assure you that these expectations will be achieved. Our actual results may differ materially from what we currently expect. Factors that may affect the results of our operations include, among others: the level of construction activities by public utilities; the concentration of revenue from a limited number of utility customers; the loss of one or more significant customers; the timing and duration of construction projects for which we are engaged; our ability to estimate accurately with respect to fixed price construction contracts; and heightened competition in the electrical construction field, including intensification of price competition. Other factors that may affect the results of our operations include, among others: adverse weather; natural disasters; effects of climate changes; changes in generally accepted accounting principles; ability to obtain necessary permits from regulatory agencies; our ability to maintain or increase historical revenue and profit margins; general economic conditions, both nationally and in our region; adverse legislation or regulations; availability of skilled construction labor and materials and material increases in labor and material costs; and our ability to obtain additional and/or renew financing. Other important factors which could cause our actual results to differ materially from the forward-looking statements in this document include, but are not limited to, those discussed in the “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” as well as those discussed elsewhere in this report and as set forth from time to time in our other public filings and public statements. In addition to the other information included in this report and our other public filings and releases, a discussion of factors affecting our business is included in our Annual Report on Form 10-K for the year ended December 31, 2014 under “Item 1A. Risk Factors” and should be considered while evaluating our business, financial condition, results of operations and prospects.

You should read this report in its entirety and with the understanding that our actual future results may be materially different from what we expect. We may not update these forward-looking statements, even in the event that our situation changes in the future, except as required by law. All forward-looking statements attributable to us are expressly qualified by these cautionary statements.

Overview

We are a provider of electrical construction services in the southeast and mid-Atlantic regions of the United States including Texas. For the six months ended June 30, 2015, our total consolidated revenue was \$64.0 million.

Through our subsidiaries, Power Corporation of America (“PCA”), Southeast Power Corporation (“Southeast Power”) and C and C Power Line, Inc. (“C&C”), we are engaged in the construction and maintenance of electric utility facilities for electric utilities and industrial customers. Southeast Power performs electrical contracting services throughout the United States. Southeast Power is headquartered in Titusville, Florida and has additional offices in Bastrop, Texas and Spartanburg, South Carolina. C&C is a full service electrical contractor, headquartered in Jacksonville, Florida. C&C has a unionized workforce and has been involved in the electrical business primarily in Florida since 1989.

The electrical construction business is highly competitive and fragmented. We compete with other independent contractors, including larger regional and national firms that may have financial, operational, technical and marketing resources that exceed our own. We also face competition from existing and prospective customers establishing or augmenting in-house service and organizations that employ personnel who perform some of the same types of services as those provided by us. In addition, a significant portion of our electrical construction revenue is derived from a small group of customers, several of which account for a substantial portion of our revenue in any given year. The relative revenue contribution by any single customer or group of customers may significantly fluctuate from period to period. For example, for the six months ended June 30, 2015 and the year ended December 31, 2014, three of our customers accounted for approximately 56% and 54%, respectively, of our consolidated revenue. The loss of, or decrease in current demand from, one or more of these customers, would, if not replaced by other business, result in a decrease in revenue, margins and profits, which could be material.

Critical Accounting Estimates

This discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to fixed price electrical construction contracts, the adequacy of our accrued remediation costs and deferred tax assets and liabilities. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable, under the circumstances, the results of which form the basis for making judgments about the carrying

values of assets and liabilities, that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. Our management has discussed the selection and development of our critical accounting policies, estimates, and related disclosure with the Audit Committee of the Board of Directors.

Percentage of Completion

We recognize revenue from fixed price contracts on a percentage-of-completion basis, using the cost-to-cost method based on the percentage of total cost incurred to date, in proportion to total estimated cost to complete the contract. Total estimated cost, and thus contract income, is impacted by several factors including, but not limited to: changes in productivity and scheduling, the cost of labor, subcontracts, materials and equipment. Additionally, external factors such as weather, site conditions and scheduling that differ from those assumed in the original bid (to the extent contract remedies are unavailable), customer needs, customer delays in providing approvals and materials, the availability and skill level of workers in the geographic location of the project, a change in the availability and proximity of materials, and governmental regulation, may also affect the progress and estimated cost of a project's completion and thus the timing of income and revenue recognition.

The accuracy of our revenue and profit recognition in a given period is almost solely dependent on the accuracy of our estimates of the cost to complete each project. Our projects can be complex and in almost every case the profit margin estimates for a project will either increase or decrease, to some extent, from the amount that was originally estimated at the time of bid. If a current estimate of total costs indicates a loss on a contract, the projected loss is recognized in full when determined. Accrued contract losses as of June 30, 2015 and December 31, 2014, were \$183,000 and \$2.5 million, respectively. The accrued contract losses for 2015 and 2014 are mainly attributable to transmission projects in Texas experiencing either adverse weather conditions or unexpected construction issues. Revenue from change orders, extra work, variations in the scope of work and claims is recognized when realization is probable.

Accrued Remediation Costs

In 2013 we originally established a contingency provision within discontinued operations of \$1.2 million, relating to a pending environmental matter with respect to a mining property, the Sierra Zinc Site located in Stevens County, Washington (the "Site"), which we sold over fifty years ago. As described in note 3 to the consolidated financial statements, during the six months ended June 30, 2015 and 2014, we increased the contingency provision within discontinued operations by \$356,000 and \$1.1 million, respectively. The increase in the contingency provision for the six months ended June 30, 2015 is associated with amounts already expended and the estimated future costs anticipated for professional, legal and EPA costs, in excess of amounts provisioned in 2014. This increase is mainly attributable to changes in the scope of the project management portion, as required by the EPA, and is estimated based on information provided by our environmental consultants.

The balance of the accrued remediation costs as of June 30, 2015 and December 31, 2014, was \$815,000 and \$1.1 million, respectively. We anticipate that the current accrual will be adequate to cover the full remediation costs. However, the accrual will be reviewed periodically based upon facts and circumstances available at the time, which could result in changes to this amount. We are currently taking certain remediation actions at the Site, which work has commenced and is expected to be substantially completed by September 30, 2015.

Deferred Tax Assets and Liabilities

We account for income taxes in accordance with ASC Topic 740, *Income Taxes*, which establishes the recognition requirements. Deferred tax assets and liabilities are recognized for the future tax effects attributable to temporary differences and carryforwards between the financial statement carrying amounts of existing assets and liabilities and the respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

As of June 30, 2015, our deferred tax assets were largely comprised of accrued vacation, accrued workers' compensation claims, accrued remediation costs and federal net operating loss carryforward. The carrying amounts of deferred tax assets are reduced by a valuation allowance, if based on the available evidence, it is more likely than not such assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which the deferred tax assets are expected to be recovered or settled. In the assessment for a valuation allowance, appropriate consideration is given to positive and negative evidence related to the realization of the deferred tax assets. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability, the duration of statutory carryforward periods, our experience with loss carryforwards expiring unused, and tax planning alternatives. If we determine we will not be able to realize all or part of our deferred tax assets, a valuation allowance would be recorded to reduce our deferred tax assets to the amount that is more likely than not to be realized.

Based on our assumption with respect to forecasts of future taxable income and tax planning, among others, we anticipate being able to generate sufficient taxable income to utilize our deferred tax assets. Therefore, we have not recorded a valuation

allowance against deferred tax assets. The minimum amount of future taxable income required to be generated to fully realize the deferred tax assets as of June 30, 2015 is approximately \$3.0 million.

RESULTS OF OPERATIONS

SIX MONTHS ENDED JUNE 30, 2015 COMPARED TO SIX MONTHS ENDED JUNE 30, 2014

The table below presents our operating income from continuing operations for the six months ended June 30, 2015 and 2014:

	2015	2014
Revenue		
Electrical construction	\$ 63,696,846	\$ 44,409,433
Other	303,867	2,851,903
Total revenue	<u>64,000,713</u>	<u>47,261,336</u>
Costs and expenses		
Electrical construction	56,455,944	38,291,826
Other	270,878	2,318,066
Selling, general and administrative	2,479,131	2,251,974
Depreciation and amortization	3,272,269	3,020,300
Loss (gain) on sale of property and equipment	17,192	(162,901)
Total costs and expenses	<u>62,495,414</u>	<u>45,719,265</u>
Total operating income	<u>\$ 1,505,299</u>	<u>\$ 1,542,071</u>

Operating income equals total operating revenue less operating costs and expenses inclusive of depreciation and amortization, and selling, general and administrative expenses. Operating costs and expenses also include any gains or losses on the sale of property and equipment. Operating income excludes interest expense, interest income, other income, and income taxes.

Revenue

Total revenue for the six months ended June 30, 2015 increased 35.4% to \$64.0 million, from \$47.3 million in the same period in 2014. Electrical construction operations revenue increased \$19.3 million (43.4%) to \$63.7 million, from \$44.4 million in the same period in 2014, due primarily to growth in our construction under master service agreements (“MSAs”).

Backlog

Our backlog represents the uncompleted portion of services to be performed under existing project-specific fixed-price and maintenance contracts and the estimated value of future services that we expect to provide under our existing MSAs.

The table below presents our total backlog as of June 30, 2015 and 2014 along with an estimate of the backlog amounts expected to be realized within 12 months and during the total life of each of the MSAs. The existing MSAs have initial terms ranging from one year to four years and some provide for additional renewals at the option of the customer. The calculation assumes exercise of the renewal options by the customer. Revenue from assumed exercise of renewal options represents \$101.1 million (59.5%) of our total estimated MSA backlog as of June 30, 2015.

	Backlog as of June 30, 2015		Backlog as of June 30, 2014	
	12 Months	Total	12 Months	Total
Electrical Construction				
Project Specific Firm Contracts	\$ 38,111,427	\$ 48,303,162	\$ 33,851,396	\$ 33,851,396
Estimated Master Service Agreements (MSAs)	34,845,234	169,946,194	26,144,341	189,661,011
Total	<u>\$ 72,956,661</u>	<u>\$ 218,249,356</u>	<u>\$ 59,995,737</u>	<u>\$ 223,512,407</u>

Our total backlog as of June 30, 2015, was \$218.2 million, compared to \$223.5 million as of June 30, 2014. Of the \$218.2 million backlog as of June 30, 2015, \$48.3 million (22.1%) is believed to be firm under project-specific fixed-price and maintenance contracts and the balance represents the estimated value of future services under our existing MSAs. This compares to a backlog of \$223.5 million as of June 30, 2014, of which \$33.9 million (15.1%) was believed to be firm under project-specific fixed-price and maintenance contracts and the balance was attributable to estimated value of future services under our existing MSAs. Of our total backlog as of June 30, 2015, we expect approximately \$73.0 million (33.4%) to be completed over the next twelve months.

[Table of Contents](#)

As of June 30, 2015, compared to December 31, 2014, our total backlog declined \$56.8 million (20.6%) and our 12-month backlog declined \$12.4 million (14.5%). These declines resulted primarily from completion of some MSA work, not replaced by new work and the reduction in estimated work under certain MSAs. Growth in non-MSA firm contracts partially offset the decrease in MSAs. We expect additional new projects under certain MSAs to be awarded in the fall of 2015.

The estimated amount of backlog for work under MSAs is calculated by using recurring historical trends inherent in current MSAs and projected customer needs based upon ongoing communications with the customer. Our estimated backlog also assumes exercise of existing customer renewal options. Certain MSAs are not exclusive to the Company and, therefore, the size and amount of projects we may be awarded cannot be determined with certainty. Accordingly, the amount of future revenue from MSA contracts may vary substantially from our current estimate. Backlog is not a term recognized under U.S. generally accepted accounting principles, but is a common measurement used in our industry. While we believe that our methodology of calculation is appropriate, such methodology may not be comparable to that employed by some other companies.

Backlog is only a snap-shot at a particular point in time and is not completely determinative of total future revenue in any particular period. It does not reflect future revenue from a significant number of short-term projects undertaken and completed between the snap-shot dates.

As of June 30, 2015 and 2014, the estimated value of future services under MSAs accounted for approximately 77.9% and 84.9% of total backlog, respectively. We plan to continue our efforts to grow MSA business. MSA contracts are generally multi-year which allows for more consistent work load and improved operating efficiencies.

Revenue estimates included in our backlog can be subject to change as a result of project accelerations, cancellations or delays due to various factors, including but not limited to: commercial issues, material deficiency, regulatory requirements and adverse weather. Our customers are not contractually committed to specific level of services under our MSAs. While we did not experience any material cancellations during the current period, most of our contracts may be terminated, even if we are not in default under the contract.

Operating Results

Electrical construction operations operating income increased \$794,000 (26.4%) to \$3.8 million for the six months ended June 30, 2015, from \$3.0 million in the same period in 2014. This increase was mainly due to the aforementioned increase in revenue attributable to growth in our construction under master service agreements.

Electrical construction operations operating margins decreased to 6.0% for the six months ended June 30, 2015, from 6.8% in the same period in 2014, in large part due to losses aggregating \$5.1 million recognized in the six months ended June 30, 2015 (largely in the first quarter) principally on projects for two utilities in Texas, which are now substantially completed. The largest loss was mainly attributable to adverse weather conditions and a safety incident on one project that resulted in a delay of approximately four weeks and caused an increase in labor and equipment rental expenses.

During the six months ended June 30, 2015, rain and, in some cases, flood conditions, significantly impaired our ability to move equipment along the power line right of way. The 2015 year to date rainfall in the area in Texas where our projects are located was more than double the year to date normal precipitation rate. The extraordinary amount of rain not only delays productive work, but also creates adverse ground conditions that slow ongoing work.

During the first quarter we made operational and management changes in our Texas operations designed to reduce production difficulties experienced on our Texas projects. The aforementioned Texas projects were substantially completed by July 2015. In providing for the amount of expected losses through completion on the Texas projects, we utilized information available through late July 2015. The losses on our Texas projects were in large part offset by improved operating results elsewhere.

With the addition of selling, general and administrative expenses ("SG&A") and depreciation we had a total operating income of \$1.5 million for the six months ended June 30, 2015, compared to total operating income of \$1.5 million in the same period in 2014.

Costs and Expenses

Electrical construction operations cost of goods sold increased by \$18.2 million to \$56.5 million for the six months ended June 30, 2015, from \$38.3 million in the same period in 2014. This increase was primarily attributable to a 43.4% higher level of electrical construction operations. The aforementioned losses relating primarily to the Texas projects also contributed to this increase. Mainly due to this increase in electrical construction expenses, total costs and expenses increased by \$16.8 million to \$62.5 million for the six months ended June 30, 2015, from \$45.7 million in the same period in 2014.

[Table of Contents](#)

The following table sets forth selling, general and administrative (“SG&A”) expenses for the six months ended June 30, 2015 and 2014:

	2015	2014
Electrical construction operations	\$ 214,647	\$ 296,685
Other	226,080	307,036
Corporate	2,038,404	1,648,253
Total	<u>\$ 2,479,131</u>	<u>\$ 2,251,974</u>

During the six months ended June 30, 2015 as compared to the same period in 2014, SG&A expenses increased 10.1% to \$2.5 million, primarily due to increases in corporate administrative expenditures, mainly compensation and increases in other professional services specifically legal and consulting. As a percentage of revenue, SG&A expenses decreased to 3.9% for 2015, from 4.8% in 2014, due primarily to the aforementioned increase in revenue during the six months ended June 30, 2015.

The following table sets forth depreciation and amortization expense for the six months ended June 30, 2015 and 2014:

	2015	2014
Electrical construction operations	\$ 3,210,427	\$ 2,979,242
Other	5,855	5,558
Corporate	55,987	35,500
Total	<u>\$ 3,272,269</u>	<u>\$ 3,020,300</u>

Depreciation and amortization expense, which includes \$31,000 and \$45,000 of amortization expense for acquired intangibles in 2015 and 2014, respectively, increased to \$3.3 million for the six months ended June 30, 2015, from \$3.0 million for the six months ended June 30, 2014, an increase of 8.3%. The increase in depreciation is mainly due to the acquisition of C&C and an increase in fixed assets purchases for new equipment, primarily for our electrical construction operations, as a result of our growth and expansion efforts.

Income Taxes

The following table presents our provision for income tax and effective income tax rate from continuing operations for the six months ended June 30, 2015 and 2014:

	2015	2014
Income tax provision	\$ 547,392	\$ 464,583
Effective income tax rate	45.1%	37.9%

Our expected tax rate for the year ending December 31, 2015, which was calculated based on the estimated annual operating results for the year, is 45.1%. Our expected tax rate differs from the federal statutory rate of 34.0% mainly due to non-deductible expenses and to a lesser extent state income taxes.

Our effective tax rate for the six months ended June 30, 2015 was 45.1% and reflects the expected tax rate. Our effective tax rate for the six months ended June 30, 2014 was 37.9% and differs from the federal statutory rate of 34.0% primarily due to state income taxes.

Discontinued Operations

Through certain of our subsidiaries and predecessor companies, we were previously engaged in mining activities and ended all such activities in December 2002. Refer to the discussion in note 3 to the consolidated financial statements for more information regarding the Site and our discontinued operations.

[Table of Contents](#)

The following table presents our results of discontinued operations for the six months ended June 30, 2015 and 2014:

	2015	2014
Provision for remediation costs	\$ (355,892)	\$ (1,070,825)
Loss from discontinued operations before income taxes	(355,892)	(1,070,825)
Income tax benefit	(154,855)	(405,478)
Loss from discontinued operations, net of tax	\$ (201,037)	\$ (665,347)

Our effective income tax benefit rate related to discontinued operations for the six months ended June 30, 2015 was (43.5)%. The effective tax benefit rate differs from the statutory rate of (34.0)% for the six months ended June 30, 2015 primarily due to non-deductible expenses and state income taxes. Our effective tax benefit rate related to discontinued operations for the six months ended June 30, 2014 was (37.9)%. The effective tax benefit rate differs from the statutory rate of (34.0)% for the six months ended June 30, 2014 primarily due to state income taxes.

THREE MONTHS ENDED JUNE 30, 2015 COMPARED TO THREE MONTHS ENDED JUNE 30, 2014

The table below presents our operating income from continuing operations for the three months ended June 30, 2015 and 2014:

	2015	2014
Revenue		
Electrical construction	\$ 33,296,684	\$ 22,890,318
Other	157,221	2,439,772
Total revenue	33,453,905	25,330,090
Costs and expenses		
Electrical construction	27,222,221	19,963,568
Other	143,143	2,009,762
Selling, general and administrative	1,477,422	1,137,747
Depreciation and amortization	1,658,424	1,521,395
Loss (gain) on sale of property and equipment	11,564	(154,896)
Total costs and expenses	30,512,774	24,477,576
Total operating income	\$ 2,941,131	\$ 852,514

Operating income equals total operating revenue less operating costs and expenses inclusive of depreciation and amortization, and selling, general and administrative expenses. Operating costs and expenses also include any gains or losses on the sale of property and equipment. Operating income excludes interest expense, interest income, other income, and income taxes.

Revenue

Total revenue for the three months ended June 30, 2015 increased 32.1% to \$33.5 million, from \$25.3 million in the same period in 2014. Electrical construction operations revenue increased \$10.4 million to \$33.3 million, from \$22.9 million in the same period in 2014, due primarily to growth in our construction under both our MSAs and non-MSA electrical construction work.

Operating Results

Electrical construction operations operating income increased \$2.8 million to \$4.3 million for the three months ended June 30, 2015, from \$1.5 million in the same period in 2014. This increase largely resulted from the aforementioned growth in large transmission projects under our current MSAs and non-MSAs.

Electrical construction operations operating margins increased to 12.9% for the three months ended June 30, 2015, from 6.5% in the same period in 2014. The increase in operating margins was largely the result of the aforementioned increase in transmission revenue, which provides the electrical construction operations the ability to spread its fixed costs over a larger revenue base. The increase in operating margins attributable to revenue was slightly offset by losses of \$1.2 million incurred from continued adverse weather conditions causing construction delays in the second quarter on the projects in Texas, which are now substantially complete.

With the addition of selling, general and administrative expenses (“SG&A”) and depreciation we had a total operating income of \$2.9 million for the three months ended June 30, 2015, compared to total operating income of \$853,000 in the same period in 2014.

Costs and Expenses

Electrical construction operations cost of goods sold increased by \$7.3 million to \$27.2 million for the three months ended June 30, 2015, from \$20.0 million in the same period in 2014. This increase was primarily attributable to a 45.5% higher level of electrical construction operations. The aforementioned losses relating to the Texas projects also contributed to this increase. Mainly due to this increase in electrical construction expenses, total costs and expenses increased by \$6.0 million to \$30.5 million for the three months ended June 30, 2015, from \$24.5 million in the same period in 2014.

The following table sets forth selling, general and administrative (“SG&A”) expenses for the three months ended June 30, 2015 and 2014:

	2015	2014
Electrical construction operations	\$ 125,178	\$ 109,468
Other	107,317	181,794
Corporate	1,244,927	846,485
Total	<u>\$ 1,477,422</u>	<u>\$ 1,137,747</u>

During the three months ended June 30, 2015 as compared to the same period in 2014, SG&A expenses increased 29.9% to \$1.5 million, primarily due to increases in corporate administrative expenditures, mainly compensation and increases in other professional services specifically legal and consulting. As a percentage of revenue, SG&A expenses decreased to 4.4% for 2015, from 4.5% in 2014, due primarily to the aforementioned increase in revenue during the three months ended June 30, 2015.

The following table sets forth depreciation and amortization expense for the three months ended June 30, 2015 and 2014:

	2015	2014
Electrical construction operations	\$ 1,627,070	\$ 1,499,642
Other	2,928	2,808
Corporate	28,426	18,945
Total	<u>\$ 1,658,424</u>	<u>\$ 1,521,395</u>

Depreciation and amortization expense, which includes \$16,000 and \$15,000 of amortization expense for acquired intangibles in 2015 and 2014, respectively, increased to \$1.7 million for the three months ended June 30, 2015, from \$1.5 million for the three months ended June 30, 2014, an increase of 9.0%. The increase in depreciation is mainly due to the acquisition of C&C and an increase in fixed assets purchases for new equipment, primarily for our electrical construction operations, as a result of our growth and expansion efforts.

Income Taxes

The following table presents our provision for income tax and effective income tax rate from continuing operations for the three months ended June 30, 2015 and 2014:

	2015	2014
Income tax provision	\$ 1,285,701	\$ 266,443
Effective income tax rate	45.9%	38.4%

Our expected tax rate for the year ending December 31, 2015, which was calculated based on the estimated annual operating results for the year, is 45.1%. Our expected tax rate differs from the federal statutory rate of 34.0% mainly due to non-deductible expenses and to a lesser extent state income taxes.

Our effective tax rate for the three months ended June 30, 2015 was 45.9% and differs from the expected tax rate due to an adjustment of annual results for the year. Our effective tax rate for the three months ended June 30, 2014 was 38.4% and differs from the federal statutory rate of 34.0% primarily due to state income taxes.

Discontinued Operations

Through certain of our subsidiaries and predecessor companies, we were previously engaged in mining activities and ended all such activities in December 2002. Refer to the discussion in note 3 to the consolidated financial statements for more information regarding the Site and our discontinued operations.

The following table presents our results of discontinued operations for the three months ended June 30, 2015 and 2014:

	2015	2014
Provision for remediation costs	\$ (355,892)	\$ (1,070,825)
Loss from discontinued operations before income taxes	(355,892)	(1,070,825)
Income tax benefit	(154,855)	(405,478)
Loss from discontinued operations, net of tax	\$ (201,037)	\$ (665,347)

Our effective income tax benefit rate related to discontinued operations for the three months ended June 30, 2015 was (43.5)%. The effective tax benefit rate differs from the statutory rate of (34.0)% for the three months ended June 30, 2015 primarily due to non-deductible expenses and state income taxes. Our effective tax benefit rate related to discontinued operations for the three months ended June 30, 2014 was (37.9)%. The effective tax benefit rate differs from the statutory rate of (34.0)% for the three months ended June 30, 2014 primarily due to state income taxes.

Liquidity and Capital Resources

Working Capital Analysis

Our primary cash needs have been for capital expenditures and working capital. Our primary sources of cash have been cash flow from operations and borrowings under our lines of credit and equipment financing. As of June 30, 2015, we had cash and cash equivalents of \$7.3 million and working capital of \$21.3 million, as compared to cash and cash equivalents of \$9.8 million, and working capital of \$19.7 million as of December 31, 2014.

In addition to cash flow from operations, we have a \$15.0 million revolving line of credit of which \$11.5 million was unused as of June 30, 2015. The revolving line of credit is used as a Working Capital Loan, as discussed in note 4 to the consolidated financial statements. We anticipate that this cash on hand, our credit facilities and our future cash flows from operating activities will provide sufficient cash to enable us to meet our operating needs and debt requirements for the next twelve months.

Cash Flow Analysis

The following table presents our net cash flows for each of the six months ended June 30, 2015 and 2014:

	2015	2014
Net cash (used in) provided by operating activities	\$ (4,629,079)	\$ 7,926,598
Net cash used in investing activities	(3,218,782)	(9,916,015)
Net cash provided by (used in) financing activities	5,305,668	(6,804,311)
Net decrease in cash and cash equivalents	\$ (2,542,193)	\$ (8,793,728)

Operating Activities

Cash flows from operating activities are comprised of net income, adjusted to reflect the timing of cash receipts and disbursements therefrom. Our cash flows are influenced by the level of operations, operating margins and the types of services we provide, as well as the stages of our electrical construction projects.

Cash used in our operating activities totaled \$4.6 million for the six months ended June 30, 2015, compared to cash provided by operating activities of \$7.9 million for 2014. The decrease in cash flows from operating activities was approximately \$12.6 million, and was primarily due to the changes reflected in the item “costs and estimated earnings in excess of billings on uncompleted contracts.” For the six months ended June 30, 2015, the change in costs and estimated earnings in excess of billings was \$(9.0) million, compared to \$362,000 for the six months ended June 30, 2014. This decrease was primarily due to several large electrical construction transmission projects being in the final stages of completion and billing, attributable to the aforementioned increase in MSA work. Operating cash flows normally fluctuate relative to the status of our electrical construction projects.

Days of Sales Outstanding Analysis

We evaluate fluctuations in our “accounts receivable and accrued billings” and “costs and estimated earnings in excess of billings on uncompleted contracts,” for our electrical construction operations, by comparing days of sales outstanding (“DSO”). We calculate DSO as of the end of any period by utilizing the respective quarter’s electrical construction revenue to determine sales per day. We then divide “accounts receivable and accrued billings, net of allowance for doubtful accounts” at the end of

the period, by sales per day, to calculate DSO for accounts receivable. To calculate DSO for costs and estimated earnings in excess of billings, we divide “costs and estimated earnings in excess of billings on uncompleted contracts,” by sales per day.

For the quarters ended June 30, 2015 and 2014, our DSO for accounts receivable were 38 and 50, respectively, and our DSO for costs and estimated earnings in excess of billings were 42 and 19, respectively. The decrease in our DSO for accounts receivable and accrued billings for the quarter ended June 30, 2015, when compared to the same quarterly period in 2014, was mainly due to the timing of the collections of some customers’ large balances, and the aforementioned increase in our balance of costs and estimated earnings in excess of billings as explained subsequently. The increase in our DSO for costs and estimated earnings in excess of billings was mainly due to several large projects being close to completion for the quarter ended June 30, 2015, when compared to the same quarterly period in 2014. As of August 11, 2015, we have received approximately 86.7% of our June 30, 2015 outstanding trade accounts receivable and have billed 57.8% of our costs and estimated earnings in excess of billings balance.

Income Taxes Paid

Income tax payments decreased to \$32,000 for the six months ended June 30, 2015 from \$225,000 for the six months ended June 30, 2014. Taxes paid for the six months ended June 30, 2015 were for the estimated 2014 income tax liability, compared to taxes paid for the same annual period in 2014, which were primarily for the estimated 2013 income tax liability.

Investing Activities

Cash used in investing activities for the six months ended June 30, 2015, was \$3.2 million, compared to cash used in investing activities of \$9.9 million for 2014. The decrease in cash used in our investing activities for the six months ended June 30, 2015, when compared to 2014, is primarily due to the acquisition of C&C in 2014. On January 3, 2014, PCA completed its acquisition of C&C as described in note 9 to the consolidated financial statements. The aggregate cash consideration paid, net of cash acquired, was \$5.8 million, of which \$101,000 was allocated to goodwill, \$1.0 million to acquired intangible assets, \$3.3 million to fixed assets, \$2.6 million to current assets and \$1.3 million to liabilities assumed.

Our investing activities for the six months ended June 30, 2015 were mainly attributable to capital expenditures of \$3.9 million. Our capital expenditures are mainly for the purchases of equipment, primarily trucks and heavy machinery, used by our electrical construction operations for the upgrading and replacement of equipment, as well as for our expansion efforts. Our capital budget for 2015 is expected to total approximately \$7.6 million, the majority of which is for continued upgrading and purchases of equipment, for our electrical construction operations. We plan to fund these purchases through our cash on hand and equipment financing, consistent with past practices.

Financing Activities

Cash provided by financing activities for the six months ended June 30, 2015, was \$5.3 million, compared to cash used in financing activities of \$6.8 million for 2014. Our financing activities for the six months ended June 30, 2015 consisted mainly of net borrowings on our \$17.0 Million Equipment Loan totaling \$17.0 million, as well as borrowings on our Working Capital Loan of \$4.5 million and borrowings on our \$2.0 Million Equipment Loan of \$2.0 million. These borrowings were offset by net repayments on our electrical construction equipment loans totaling \$10.2 million, repayments on our \$3.5 Million Acquisition Loan of \$2.9 million, installment loan repayments of \$3.3 million, repayments on our Working Capital Loan of \$1.0 million, and repayments on our \$17.0 Million Equipment Loan of \$851,000. Our financing activities for the six months ended June 30, 2014 consisted mainly of repayments on our Working Capital Loan of \$7.0 million, net repayments on our equipment loans totaling \$2.0 million, repayments on our acquisition loan of \$292,000 and installment loan repayments of \$976,000. These repayments were offset by borrowings on our acquisition loan of \$3.5 million.

We have paid no cash dividends on our Common Stock since 1933, and it is not expected that we will pay any cash dividends on our Common Stock in the immediate future.

Debt Covenants

Our debt arrangements contain various financial and other covenants including cross-default provisions whereby any default under any loans of the Company (or its subsidiaries) with the lender will constitute a default under all of the other loans of the Company (and its subsidiaries) with the lender. The most significant of the covenants are: maximum debt to tangible net worth ratio and fixed charge coverage ratio. We must maintain: a tangible net worth of at least \$20.0 million calculated quarterly; no more than \$500,000 in outside debt (with certain exceptions); a maximum debt to tangible net worth ratio of no greater than 2.5 : 1.0 and a fixed charge coverage ratio that is to equal or exceed 1.3 : 1.0. The fixed charge coverage ratio is calculated annually using EBITDAR (earnings before interest, taxes, depreciation, amortization and rental expense) divided by the sum of CPLTD (current portion of long term debt), interest expense and rental expense. We were in compliance with all of our covenants as of June 30, 2015.

The following are computations of these most restrictive financial covenants:

Covenants Measured at Quarter End:	Covenant	Actual as of June 30, 2015
Tangible net worth minimum	\$ 20,000,000	\$ 30,215,378
Outside debt not to exceed	\$ 500,000	\$ —
Maximum debt/tangible net worth ratio not to exceed	2.5 : 1.0	1.71 : 1.0
Covenants Measured at Year End:		
Fixed charge coverage ratio must equal or exceed	1.3 : 1.0	1.52 : 1.0

Forecast

We anticipate our cash on hand and cash flows from operations and credit facilities will provide sufficient cash to enable us to meet our working capital needs, debt service requirements and planned capital expenditures, for at least the next twelve months. The amount of our planned capital expenditures will depend, to some extent, on the results of our future performance. However, our revenue, results of operations and cash flows, as well as our ability to seek additional financing, may be negatively impacted by factors including, but not limited to: a decline in demand for electrical construction services, general economic conditions, heightened competition, availability of construction materials, increased interest rates, and adverse weather conditions.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Not applicable to smaller reporting companies.

Item 4. Controls and Procedures.

Evaluation of disclosure controls and procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized, and reported within the time periods specified in the rules and forms of the SEC, and that such information is accumulated and communicated to our management in a timely manner. An evaluation was performed under the supervision and with the participation of our management, including John H. Sottile, our Chief Executive Officer ("CEO"), and Stephen R. Wherry, our Chief Financial Officer ("CFO"), of the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of June 30, 2015. Based upon this evaluation, our management, including our CEO and our CFO, concluded that our disclosure controls and procedures were effective, as of June 30, 2015, at the reasonable assurance level.

Management's report on internal control over financial reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Exchange Act Rule 13a-15(f), which consists of processes and procedures designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of our published financial statements. Under the supervision and with the participation of our management, including our CEO and CFO, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2014, based on the criteria set forth in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 Framework). Based on our assessment, we believe that as of December 31, 2014, our internal control over financial reporting was effective based on those criteria.

Changes in internal control

No changes in our internal control over financial reporting occurred during the second quarter of 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations on the effectiveness of controls

A control system, no matter how well conceived and operated, can provide only reasonable assurance, not absolute assurance that the objectives of the control system are met. Because of inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues, if any, within a company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that the design will succeed in

achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies and procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

Through certain of our subsidiaries and predecessor companies, the Company was previously engaged in mining activities and ended all such activities in December 2002. Effective September 15, 2014, the Company entered into an Administrative Order on Consent (“AOC”) with the United States Environmental Protection Agency (the “EPA”) with respect to a previously owned mining property, the Sierra Zinc Site (the “Site”), located in Stevens County, Washington. The Company sold the Site over fifty years ago.

For more detailed information regarding this matter and settlement of declaratory judgment actions with respect to insurance coverage, please see the discussion set forth in note 3 to the consolidated financial statements in this Form 10-Q.

Item 1A. Risk Factors.

There have been no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(a) None

(b) None

(c) The Company has had a stock repurchase plan since September 17, 2002, when the Board of Directors approval was announced. As last amended by the Board of Directors on September 11, 2014, this plan permits the purchase of up to 3,500,000 shares. There is currently available for purchase through September 30, 2015 a maximum of 1,154,940 shares. The Company may repurchase its shares either in the open market or through private transactions. The volume of the shares to be repurchased is contingent upon market conditions and other factors. No shares have been purchased since 2006. As of June 30, 2015, the total number of shares repurchased under the Repurchase Plan was 2,345,060 at a cost of \$1,289,467 (average cost of \$0.55 per share). The Company currently holds the repurchased stock as Treasury Stock, reported at cost. Prior to September 17, 2002, the Company had 17,358 shares of Treasury Stock which it had purchased at a cost of \$18,720.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

None.

Item 6. Exhibits.

CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY
ACT OF 2002 15 U.S.C. SECTION 7241

I, John H. Sottile, certify that:

1. I have reviewed this quarterly report on Form 10-Q of The Goldfield Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002
18 U.S.C. SECTION 1350

In connection with the Quarterly Report of The Goldfield Corporation (the "Company") on Form 10-Q for the six months ended June 30, 2015 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, John H. Sottile, Chairman of the Board, President and Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and result of operations of the Company.

A signed original of this written statement required by Section 906 has been provided to The Goldfield Corporation and will be retained by The Goldfield Corporation and furnished to the Securities and Exchange Commission or its staff upon request.
